

PDG Helicopters operate 5 of these versatile Twin Squirrel helicopters.

With a cruise speed of 120 mph and a seating capacity of 5 passengers, the aircraft is ideal for passenger charter flights including airport transfers, corporate hospitality, social and sporting events.

Twin engines allow the aircraft to operate lower over built up areas and longer over water making the helicopter the ideal platform for aerial filming, aerial photography and aerial survey.

- **Up to 5 passengers**
- **Twin gas turbine engines**
- **Single or dual pilot**
- **120 mph cruise speed**
